### Major orders in Asia for GF Machining Solutions

**GF Machining Solutions, a division of GF, has received two major orders from well-known electronic device manufacturers. The Information and Communication Technology (ICT) sector is one of the key market segments of GF Machining Solutions.**

The orders consist of more than 100 machines to be used for the manufacture of the next generation of high-end electronic devices. They include Electric Discharge Machines (EDM) as well as milling machines for a total value exceeding USD 20 million. The machines are produced at the GF Machining Solutions production facilities in Switzerland and in China and will be delivered in the upcoming six months.

GF Machining Solutions provides machine tools, automation solutions and customer services for the production of molds, dies and high value-added metal parts. The division has manufacturing facilities in Switzerland, Sweden and China, and serves its customers through its own sales companies in more than 50 countries.
